

Symposium Workshops

May 27, 2009

Workshop 1: Natural Areas Weed Management Preparation Class

Individuals planning to take the Natural Areas Weed Management Certified Pesticide Applicator examination should attend this three-hour training session. Participants will receive an overview of pest plants and their recommended chemical controls, a review of chemical control methodologies, herbicide characteristics and their behavior in the environment, and methods for herbicide dilution and rate calculations.

Limit 30 participants

Workshop 2: Herbicide Resistance in Invasive Plant Management

Participants will be introduced to herbicide activity and mode-of-action as it relates to those factors involved in the development of resistance. Strategies to prevent or delay herbicide resistance in natural areas management will also be discussed. Limit 40 participants

Workshop 3: Creating Invasive Plant Management Plans-Getting Started with Essential Information

This workshop will provide participants with fundamentals of developing effective invasive plant management plans. Participants will learn how to identify and prioritize key components of operational plans. Case studies and practical examples of integrated pest management techniques will also be discussed. Limit 45 participants

Discounted room rates are available to conference attendees at the Delray Beach Marriott. Please request the FLEPPC Conference group rate or use the group code (FEPFEPA) or (FEPFEPB) when booking online.
