Natural Area Weed Management A Training Manual for Restricted Use

Pesticide Applicators by Kenneth A. Langeland

SP 295, \$12

Institute of Food and Agricultural Sciences, University of Florida, Gainesville

Natural Area Weed Management is a training manual for pesticide applicators who apply herbicides to control invasive vegetation in natural areas of Florida. The manual contains information on herbicide application and safety in natural areas. *Identification and Biology of Non-Native Plants Found in Florida's Natural Areas* (SP 257) is recommended for use in identification of invasive plants. These two manuals, developed as study guides for persons seeking to be certified and licensed by the Florida Department of Agriculture and Consumer Services to apply pesticides in the Natural Area Weed Management category, are also useful resources for land managers and other persons with an interest in identifying and managing invasive plants.
