

FLEPPC List Definitions: *Exotic* – a species introduced to Florida, purposefully or accidentally, from a natural range outside of Florida. *Native* – a species whose natural range included Florida at the time of European contact (1500 AD). *Naturalized exotic* – an exotic that sustains itself outside cultivation (it is still exotic; it has not “become” native). *Invasive exotic* – an exotic that not only has naturalized, but is expanding on its own in Florida native plant communities.

Abbreviations: **Government List (Gov. List):** **P** = Prohibited by Florida Department of Environmental Protection; **N** = Noxious weed listed by Florida Department of Agriculture & Consumer Services; **U** = Noxious weed listed by U.S. Department of Agriculture.
Regional Distribution (Reg. Dis.): **N** = north; **C** = central; **S** = south; referring to each species’ current distribution in general regions of Florida (not its potential range in the state). Please refer to the adjacent map.

Florida Exotic Pest Plant Council’s 2007 List of Invasive Plant Species

Purpose of the List:

To focus attention on —

- ▶ the adverse effects exotic pest plants have on Florida’s biodiversity and plant communities,
- ▶ the habitat losses from exotic pest plant infestations,
- ▶ the impacts on endangered species via habitat loss and alteration,
- ▶ the need to prevent habitat losses through pest-plant management,
- ▶ the socio-economic impacts of these plants (e.g., increased wildfires in certain areas),
- ▶ changes in the seriousness of different pest plants over time,
- ▶ the need to provide information that helps managers set priorities for control programs.
